1.0 SUMMARY

Environmental Consulting & Technology, Inc. (ECT), has conducted a Phase I environmental site assessment (ESA) of the commercial property located at 528 Southeast Fifth Avenue in Gainesville, Alachua County, Florida 32601 (subject property or subject site) in conformance with the scope and limitations of American Society for Testing and Materials (ASTM) Practice E 1527-05 for Phase I ESAs. The subject property consists of approximately 4.09 acres of land developed with three single-story commercial buildings currently occupied by Gainesville Regional Utilities (GRU) Water/Wastewater and Field Services Departments. The subject site is located northwest of the intersection of Southeast Fifth Avenue and Southeast Sixth Terrace.

ECT has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-05. Any exceptions to, or deletions from, this practice are described in Section 11.0 of this report. This assessment has revealed evidence of recognized environmental conditions (RECs) associated with the subject property.

2.0 INTRODUCTION

ECT has conducted a Phase I ESA of the property located at 528 Southeast Fifth Avenue in Gainesville, Alachua County, Florida 32601 (Figure 1). The subject property is developed with three single-story block buildings located in an area of primarily commercial and residential land uses.

2.1 PURPOSE

The client requested that ECT conduct a Phase I ESA of the subject site. The objective of the Phase I ESA is to identify RECs in connection with the property, to the extent feasible pursuant to the processes prescribed in ASTM Practice E 1527-05 guidelines. A REC is defined by ASTM as the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or the material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term REC is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

This Phase I ESA includes information gathered from federal, state, and local agencies; personal interviews with people familiar with the subject property and surrounding properties; and a site visit conducted by ECT representatives. The report is intended to meet the due diligence requirements of ASTM Practice E 1527-05.

2.2 <u>DETAILED SCOPE OF SERVICES</u>

The Phase I ESA conducted by ECT included, but was not limited to, the following services:

- A site visit of the subject property to look for evidence of the release(s) of hazardous materials and petroleum products and to assess the potential for onsite releases of hazardous materials and petroleum products.
- Drive-by observations of adjacent properties and the site vicinity.
- Interviews with people familiar with the subject site, as available.
- Review of regulatory agency file information.
- Review of historical documents, as available.
- Preparation of a report presenting the Phase I ESA findings including a summary of conclusions and recommendations.

2.3 SIGNIFICANT ASSUMPTIONS

The purpose of this Phase I ESA is to provide appropriate inquiry into the previous use of the subject property consistent with good commercial and customary practice in an effort to minimize liability. ECT assumes that the information provided by Ms. Regina Embry (environmental contact), the regulatory database electronic search report provider, and the regulatory agencies is true and reliable.

2.4 LIMITATIONS AND EXCEPTIONS

The opinions and recommendations presented in this report are based upon the scope of services, information obtained through the performance of the services, and the schedule as agreed upon by ECT and the party for whom this report was originally prepared. This report is an instrument of professional service and was prepared in accordance with the generally accepted standards and level of skill and care under similar conditions and circumstances established by the environmental consulting industry. No representation, warranty, or guarantee, expressed or implied, is intended or given. To the extent that ECT relied upon any information prepared by other parties not under contract to ECT, ECT makes no representation as to the accuracy or completeness of such information. This report is expressly for the sole and exclusive use of the party for whom this report was

originally prepared for a particular purpose. Only the party for whom this report was originally prepared and/or other specifically named parties have the right to make use of and rely upon this report. Reuse of this report or any portion thereof for other than its intended purpose, or if modified, or if used by third parties, shall be at the user's sole risk.

The findings presented in this report apply solely to site conditions existing at the time when ECT's assessment was performed. It must be recognized, however, that an ESA is intended for the purpose of determining the potential for contamination through limited research and investigative activities and in no way represents a conclusive or complete site characterization. Conditions in other parts of the project site may vary from those at the locations where data were collected. ECT's ability to interpret investigation results is related to the availability of the data and the extent of the investigation activities. As such, 100 percent confidence in ESA conclusions cannot reasonably be achieved.

ECT, therefore, does not provide any guarantees, certifications, or warranties that a property is free from environmental contamination. Furthermore, nothing contained in this document shall relieve any other party of its responsibility to abide by contract documents and applicable laws, codes, regulations, or standards.

2.5 SPECIAL TERMS AND CONDITIONS

The scope of work for this Phase I ESA did not include testing of electrical equipment for the potential presence of polychlorinated biphenyls (PCBs) or the assessment of natural hazards such as naturally occurring asbestos or methane gas, assessment of the potential presence of radionuclides, or assessment of nonchemical hazards such as the potential for damage from earthquakes or floods. This Phase I ESA also did not include an extensive assessment of the environmental compliance status of the subject property or of the businesses operating onsite, or a health-based risk assessment.

2.6 <u>USER RELIANCE</u>

This Phase I ESA was conducted for the use of, and reliance by the City of Gainesville. No use of the information contained in this report by others is permissible without receiving prior written authorization to do so from ECT. ECT is not responsible for independent conclusions, opinions, or recommendations made by others or otherwise based on the findings presented in this report.

3.0 SITE DESCRIPTION

This section presents a general overview of the subject property, onsite improvements, and surrounding properties.

3.1 LOCATION AND LEGAL DESCRIPTION

The parcel of land consists of three buildings and cleared land. Located on the south portion of the parcel is the GRU water/wastewater office space building. Located east of the GRU water/wastewater building is the GRU field services office space building. On the north portion of the parcel is the GRU field services technician facility, which is composed of a locker room/break room and a storage warehouse. Vehicles are parked on the cleared land. The property is approximately 178,202 square feet (4.09 acre), bordered on the west by Southeast Sixth Terrace, south by Southeast Fourth Avenue, and north by Southeast Fifth Avenue; and is surrounded by some residential, additional GRU commercial property, and a power plant. The Alachua County Property Appraiser's Office information indicates that the property is owned by the City of Gainesville.

3.2 SITE AND VICINITY GENERAL CHARACTERISTICS

A site vicinity map and a site map are presented as Figure 1. The adjacent properties are developed with residences to the east and north and GRU buildings to the west and south.

3.3 CURRENT USE OF THE PROPERTY

The subject property is currently occupied by GRU water/wastewater, field services, and field services technician facilities.

3.4 <u>DESCRIPTIONS OF STRUCTURES, ROADS, AND OTHER IMPROVE-MENTS ON THE SITE</u>

3.4.1 GENERAL DESCRIPTION OF STRUCTURES

There are three single-story buildings located on the subject property. Two of the buildings are constructed of concrete block. The water/wastewater office building was constructed of brick. The current interior of the buildings are as followed:

• GRU water/wastewater building (located on the southwest corner of the subject property)

Flooring

Office Space Carpet

Storage Rooms Vinyl flooring

Ceiling

Entire Office Area 2- by 2-foot (ft) ceiling tiles

Walls

Entire Office Area Drywall

• GRU field services building (located on the south portion of the subject property)

Flooring

Office Space Carpet and vinyl flooring

Ceiling

Entire Office Area 2- by 2-ft ceiling tiles

Walls

Entire Office Area Wallpaper

• GRU Field Services Technician Facility (located on the north portion of the subject property)

Flooring

Break room/Restrooms 12- by 12-inch ceramic tile

Garage Area Concrete slab

Ceiling

Break room/Restrooms 2- by 2-ft ceiling tile

Garage Area Metal roof

Walls

Entire Office Area Concrete block

All of the building materials were observed in good condition.

3.4.2 ROADS

Access to the property is via Southeast Fifth Avenue.

3.4.3 POTABLE WATER SUPPLY

According to the site contact, potable water is supplied by the City of Gainesville.

3.4.4 SEWAGE DISPOSAL SYSTEM

According to the site contact, sanitary sewer service is supplied by the City of Gaines-ville.

3.4.5 CURRENT USES OF THE ADJOINING PROPERTIES

Commercial establishments abut the subject site.

4.0 USER-PROVIDED INFORMATION

This section identifies information provided by Ms. Regina Embry of GRU to ECT.

4.1 <u>TITLE RECORDS</u>

No title records were provided to ECT by the client.

4.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

Ms. Regina Embry (GRU environmental contact) was asked the following questions as part of the assessment:

- Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?
- Are you aware of any activity or land use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

Ms. Embry stated no to both questions.

4.3 SPECIALIZED KNOWLEDGE

Ms. Embry was asked the following questions as part of the assessment:

- Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
- Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases?
- Do you know the past uses of the property?

- Do you know of specific chemicals that are present or once were present at the property?
- Do you know of spills or other chemical releases that have taken place at the property?
- Do you know of any environmental cleanups that have taken place at the property?
- Do you know of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?
- Do you know of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?
- Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?

Ms. Embry stated that she was an engineer for GRU, as an internal consultant for potential environmental impact/considerations. She also stated that she was familiar with the chemicals currently present on the property. She answered no to the remaining questions.

4.4 <u>COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFOR-</u>MATION

Ms. Embry was asked the following question as part of the assessment:

• Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

Ms. Embry stated no to the question.

4.5 <u>VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES</u>

Ms. Embry was asked whether the purchase price for this property reasonably reflects the fair market value of the property.

Ms. Embry answered no to the question.

4.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

City of Gainesville currently owns the subject property. Mr. Ralph Wisco was identified as the site contact, and Ms. Regina Embry was identified as the environmental contact.

4.7 REASON FOR PERFORMING PHASE I

The reason for performing the Phase I ESA is to assess the presence/absence of RECs in accordance with the ASTM standard.

4.8 OTHER

No other information was provided.

5.0 RECORDS REVIEW

The following section presents the results of a review of readily ascertainable federal and state regulatory agency files obtained through an electronic search of the records and a historical records review, including aerial photographs, topographic maps, Sanborn fire insurance maps, and city directories pertaining to the subject property, adjacent properties, and proximate properties.

5.1 STANDARD ENVIRONMENTAL RECORD SOURCES

Regulatory agency database information was obtained from Environmental Database Resources, Inc. (EDR), which maps and lists properties in federal and state environmental databases with existing conditions or status that may have the potential to affect the subject site. The report is provided as Appendix A.

5.1.1 FEDERAL ENVIRONMENTAL RECORD SOURCES

The following federal databases were reviewed in accordance with the ASTM Practice E 1527-05 requirements:

5.1.1.1 National Priorities List (NPL; 1.0-mile)

The National Priorities List (NPL) is a subset of the Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) and identifies over 1,200 sites for priority cleanup under the Superfund program. An NPL site must meet or surpass a predetermined hazard ranking system score, be chosen as a state's top priority site, or meet three specific criteria set jointly by the U.S. Department of Health and Human Services and the U.S. Environmental Protection Agency (EPA). Source: EPA.

There are no listed NPL properties within 1.0-mile radius of the subject property.

5.1.1.2 Delisted NPL Site List (NPL; 1.0-mile)

The Delisted NPL Site List includes properties that have been delisted from the NPL.

There are no delisted NPL properties within 0.5-mile radius of the subject property.

5.1.1.3 <u>Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS; 0.5-mile)</u>

The CERCLIS database contains data on potentially hazardous waste sites that have been reported to EPA by states, municipalities, private companies, and private persons pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The CERCLIS list includes sites that are either proposed for the NPL or in the screening and assessment phase for possible inclusion on the NPL. Source: EPA/National Technical Information Service (NTIS).

There is one CERCLIS facility listed within 0.5-mile radius of the subject property.

Gainesville Gasification Plant, at 710 Southeast 2nd Street, is located approximately 0.29 mile to the west-southwest of the subject property. The site was previously occupied by coal gasification facility. As of August 29, 2000, the State is handling the site as a special case that occurred prior to the Florida Department of Environmental Protection (FDEP)/EPA Memorandum of Understanding regarding Brownfield sites.

5.1.1.4 <u>CERCLIS-No Further Remedial Action Planned (CERCLIS-NFRAP;</u> 0.5-mile)

The CERCLIS-NFRAP database contains data on sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require federal Superfund action or NPL consideration. Source: EPA/NTIS.

There are no CERCLIS-NFRAP listed properties within 0.5-mile radius of the subject property.

5.1.1.5 Corrective Action Report (CORRACTS; 1.0-mile)

The CORRACTS database identifies hazardous waste handlers with Resource Conservation and Recovery Act (RCRA) corrective action activity. Source: EPA.

There are no CORRACTS listed facilities within a 1.0-mile radius of the subject property.

5.1.1.6 Resource Conservation and Recovery Act (RCRA) Treatment, Storage, and Disposal (TSD) Facilities (0.5-mile)

The RCRA TSD Facilities database includes selected information on facilities that generate, transport, store, treat, and/or dispose of hazardous waste, as defined by RCRA.

There are no listed TSD properties within 0.5-mile radius of the subject property.

5.1.1.7 RCRA Generators Lists (Site and Adjoining Properties)

RCRA large-quantity generators (LQG) are those facilities that generate at least 1,000 kilograms per month (kg/month) of nonacutely hazardous waste or meet other applicable RCRA requirements. Resource Conservation and Recovery Information System (RCRIS) small-quantity generators (SQG) generate between 100 and 1,000 kg/month of nonacutely hazardous waste or meet other applicable RCRA requirements.

The subject and adjoining properties contain eight listed RCRA-SQG facilities within a 0.5-mile radius of the subject property.

USGSA, at 401 Southeast First Avenue, is located approximately 0.34 mile to the northwest of the subject property. On April 17, 1997, there were two violations determined for this site. Both achieved compliance April 21, 1997.

Harfred Auto Imports, at 506 East University Avenue, is located approximately 0.37 mile to the north-northwest of the subject property. On September 24, 1987, there was one violation determined for this site. The site achieved compliance October 1, 1987.

Lewis Oil Company Inc., at 701 Southeast Seventh Street, is located approximately 0.08 mile to the south-southeast of the subject property. No violations were found at this site.

GRU Op Centers is located at 555 Southeast Fifth Avenue. No violations were found at the site.

GRU Utilities Fleet Management is located at 405 Southeast Fifth Avenue. No violations were found at the site.

Texaco #246710220, at 621 Southeast Depot Avenue, is located approximately 0.24 mile to the west-southwest of the subject property. No violations were found at this site.

Ahrens Z Car Specialists Inc., at 604 Southeast Second Street, is located approximately 0.28 mile to the west of the subject property. No violations were found at this site.

John R. Kelly Generating Station, at 605 Southeast Third Street, is located approximately 0.24 mile to the west of the subject property. No violations were found at this site.

5.1.1.8 Federal Institutional Control/Engineering Control Registries (Site only)

Federal institutional control and engineering control registries were requested in the database search. The subject property is not identified on either registry.

5.1.1.9 Emergency Response Notification System (ERNS; Site Only)

ERNS is a national database that records and stores information on reported releases of oil and hazardous substances. The database contains information on spill reports made to federal authorities including the EPA, U.S. Coast Guard, National Response Center, and Department of Transportation.

The subject property is not listed on the ERNS database.

5.1.1.10 PCB Activity Database (PADS)

The PCB activity database identifies generators, transporters, commercial storers, and/or brokers or disposers of PCBs who are required to notify EPA of such activities. The source of this database is the EPA.

GRU Op Centers is located at 555 Southeast Fifth Avenue. No violations were found at the site.

5.1.1.11 Facility Index System (FINDS)

The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statues); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the EPA/NTIS.

The subject and adjoining properties contain two listed FINDS facilities within a 0.5-mile radius of the subject property.

Lewis Oil Company Inc., at 701 Southeast Seventh Street, is located approximately 0.08 mile to the south-southeast of the subject property. No violations were listed at this site.

GRU Op Centers is located at 555 Southeast Fifth Avenue. No violations were listed at the site.

5.1.1.12 Aboveground Storage Tanks (ASTs)

Shortly after the September 11 event, FDEP was instructed to remove the detail about some of the storage tank facilities in the state from their reports. Federal-owned facilities and bulk storage facilities are included in that set.

The subject and adjoining properties contain four listed AST facilities within a 0.5-mile radius of the subject property.

Gainesville City Fleet Maintenance Facility is located at 400 Southeast Fifth Avenue. On December 1, 2003, one 500-gallon fuel oil-onsite heat AST was removed for the site. Currently, there is one 100-gallon misc. petrol-based product AST, one 250-gallon waste oil AST, one 500-gallon waste oil AST, and two 500-gallon fuel oil-onsite heat ASTs in service.

Gainesville City Regional Utilities is located at 555 Southeast Fifth Avenue. Currently, there are two 10,000-gallon misc. petrol-based product ASTs, one 2,500-gallon misc. petrol-based product AST, one 750-gallon misc. petrol-based product AST, and one 65-gallon fuel oil-onsite heat AST in service. On May 1, 2004, five 65-gallon fuel oil-onsite heat ASTs were removed.

GRU Administration Building, at 301 Southeast Fourth Avenue is located approximately 0.26 mile to the west-northwest of the subject property. Currently, there is one 4,200-gallon emergency generator diesel AST in service.

Rinker Materials Gainesville PLT, at 900 Southeast Fourth Street, is located approximately 0.29 mile to the south-southwest of the subject property. On July 31, 1988, one 275-gallon vehicular diesel AST was removed.

5.1.2 STATE ENVIRONMENTAL RECORD SOURCES

The following state databases were reviewed in accordance with the ASTM Practice E 1527-05 requirements.

5.1.2.1 <u>State-Equivalent CERCLIS Hazardous Waste Sites (SHWS/State Sites; 1.0-mile)</u>

The state hazardous waste database lists potential or confirmed hazardous substance release properties.

There are no properties listed on this database within 1.0-mile radius of the subject property.

5.1.2.2 State/Tribal SWF (0.5-mile)

This database is an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 2004 criteria for solid waste landfills or disposal sites.

There is one landfill or solid waste facility listed within 0.5 mile of the subject property.

O'Steen Brothers CDS, at 1.5 miles south of Archer Road/State Road 24 located within 0.5 mile north-northwest of the subject property is currently closed with no monitoring.

5.1.2.3 <u>State/Tribal Leaking Underground Storage Tank Database (LUST; 0.5-mile)</u>

The Leaking Underground Storage Tank incident reports contain an inventory of reported LUST incidents. The data comes from FDEP's PCT01-Petroluem Contamination Detail Report.

There are 34 LUST facilities listed within 0.5-mile radius of the subject property.

Gainesville City Fleet Maintenance Facility is located at 400 Southeast Fifth Avenue. There were six discharges on January 29, 1987. Remedial action (RA)-ongoing cleanup was required. The cleanup work status is inactive. The facility has been assigned a site priority score of 10. The status of the site is facility open.

Moody and Salzman, at 506 East University Avenue, is located approximately 0.37 mile to the north-northwest of the subject property. There were four discharges on December 22, 1988. RA-ongoing cleanup was required. The cleanup work status is active. The facility has been assigned a site priority score of 46. The status of the site is facility closed.

Gainesville City Fire Station No. 1, at 427 South Main Street, is located approximately 0.4 mile to the west of the subject property. There were three discharges on April 14, 1989. Cleanup was required, and No Further Action (NFA) completed on July 5, 1991. The status of the site is facility closed.

Cavalier Products Inc., at 404 South Main Street, is located approximately 0.41 mile to the west-northwest of the subject property. There were four discharges on June 26, 1988. RA-ongoing cleanup was required. The cleanup work status is active. The facility has been assigned a site priority score of 79. The status of the site is facility closed.

Tenneco #7408, at 403 South Main Street, is located approximately 0.41 mile to the west-northwest of the subject property. There were four discharges on February 24, 1986. RA-ongoing cleanup was required. The cleanup work status is active. The facility has been assigned a site priority score of 79. The status of the site is facility closed.

Gate #112, at 905 East University Avenue, is located approximately 0.41 mile to the north-northeast of the subject property. There were five discharges on April 1, 1987. RA-ongoing cleanup was required. The cleanup work status is active. The facility has been assigned a site priority score of 32. The status of the site is facility closed.

Ed's Beverage Mart, at 904 East University Avenue, is located approximately 0.41 mile to the north-northeast of the subject property. There were four discharges on December 18, 1986. Cleanup was required. On December 19, 2003, the discharge cleanup status is Site Rehabilitation Completion Report (SRCR)-complete. The facility has been assigned a site priority score of 85. The status of the site is facility closed.

Fleet Fuel Center #2, at 905 East University Avenue, is located approximately 0.41 mile to the north-northeast of the subject property. There were five discharges on August 30, 1988. Cleanup was required. On December 19, 2003, the discharge cleanup status is SRCR-complete. The facility has been assigned a site priority score of 85. The status of the site is facility closed.

Sun Circle Inc., at 310 South Main Street, is located approximately 0.42 mile to the west-northwest of the subject property. There were four discharges on November 6, 1987. Cleanup was required. On January 5, 2004, the discharge cleanup status is NFA complete. The facility has been assigned a site priority score of 27. The status of the site is facility closed.

Coca Cola Bottling Co., at 929 East University Avenue, is located approximately 0.42 mile to the northeast of the subject property. There were five discharges on June 29, 1989. Cleanup was required. On November 4, 1994, the discharge cleanup status is SRCR complete. The status of the site is facility closed.

Pop-A-Top II, at 930 East University Avenue, is located approximately 0.42 mile to the northeast of the subject property. There were four discharges on July 5, 1988. RA-ongoing cleanup was required. The cleanup work status is active. The facility has been assigned a site priority score of 45. The status of the site is facility closed.

Media Image Photography, at 21 Southeast Second Place, is located approximately 0.43 mile to the west-northwest of the subject property. There were four discharges on December 20, 1988. Cleanup was required. On July 29, 1991, the discharge cleanup status is NFA complete. The facility has been assigned a site priority score of 56. The status of the site is facility closed.

Corner Station Inc., at 223 South Main Street, is located approximately 0.44 mile to the west-northwest of the subject property. There were four discharges on February 25, 1988.

RA-ongoing cleanup was required. The cleanup work status is active. The facility has been assigned a site priority score of 79. The status of the site is facility closed.

Swifty Mart #634, at 1007 East University Avenue, is located approximately 0.47 mile to the northeast of the subject property. There were three discharges on December 8, 1987. Cleanup was required, Eligible No Task Level Data (ENTD). The cleanup work status is inactive. The facility has been assigned a site priority score of 30. The status of the site is facility closed.

Scruggs and Carmichael Property, at 1 Southeast First Avenue, is located approximately 0.49 mile to the northwest of the subject property. There were three discharges on January 11, 1999. RA-ongoing cleanup was required. The cleanup work status is active. The facility has been assigned a site priority score of 9. The status of the site is facility closed.

Gainesville Marine, Inc., at 1030 East University Avenue, is located approximately 0.50-mile to the northeast of the subject property. There were five discharges on July 19, 1993. Cleanup was required. On July 29, 1994, the discharge cleanup status is SRCR complete. The facility has been assigned a site priority score of 6. The status of the site is facility closed.

Chevron-Franks Eastside, at 1059 East University Avenue, is located approximately 0.50 mile to the northeast of the subject property. There were five discharges on June 20, 1988. Site Assessment (SA)-ongoing cleanup was required. The cleanup work status is active. The facility has been assigned a site priority score of 6. The status of the site is facility closed.

Sprint #1307, at 20 Waldo Road Northeast, is located approximately 0.50 mile to the northeast of the subject property. There were four discharges on June 2, 1988. Cleanup was required. On June 13, 1995, the discharge cleanup status is NFA-complete. The facility has been assigned a site priority score of 26. The status of the site is facility open.

Gator Marine, at 1221 East University Avenue, is located approximately 0.50 mile to the east-northeast of the subject property. There were four discharges on March 18, 1991. Cleanup was required, ENTD. The cleanup work status is inactive. The facility has been assigned a site priority score of 10. The status of the site is facility closed.

Alachua County Sheriff's Office, at 913 Southeast Fifth Street, is located approximately 0.50 mile to the south-southwest of the subject property. There were four discharges on March 07, 1988. RA-ongoing cleanup was required. The cleanup work status is active. The facility has been assigned a site priority score of 31. The status of the site is facility closed.

Rinker Materials Gainesville PLT, at 900 Southeast Fourth Street, is located approximately 0.29 mile to the south-southwest of the subject property. There were four discharges on December 8, 1995. RA-ongoing cleanup was required. Cleanup was required. On April 6, 2005, the discharge cleanup status is SRCR complete. The facility has been assigned a site priority score of 5. The status of the site is facility closed.

Continental Imports, at 604 Southeast Second Street, at 913 Southeast Fifth Street, is located approximately 0.28 mile to the south-southwest of the subject property. There were four discharges on December 30, 1988. Cleanup was required. On March 24, 1992, the discharge cleanup status is NFA complete. The facility has been assigned a site priority score of 56. The status of the site is facility closed.

Poole Roofing and Sheet Metal, at 710 Southeast Second Street, is located approximately 0.29 mile to the west-southwest of the subject property. There were four discharges on August 30, 1988. RA-ongoing cleanup was required. The cleanup work status is active. The facility has been assigned a site priority score of 41. The status of the site is facility closed.

Ferber and Osteen Roofing and Sheet Metal, at 710 Southeast Ninth Place, is located approximately 0.29 mile to the south of the subject property. There were three discharges

on December 27, 1988. Cleanup was not required. On May 29, 2001, the discharge cleanup status is Not Required (NREQ)-complete. The status of the site is facility closed.

Gainesville Food Store, at 1030 Southeast Fourth Avenue, is located approximately 0.33 mile to the east northeast of the subject property. There were four discharges on December 29, 1986. Cleanup was required. On October 9, 2000, the discharge cleanup status is Partially Eligible, No Task Level Data (PNTD)-inactive. The facility has been assigned a site priority score of 10. The status of the site is facility closed.

Jimmy's Auto Mart, at 944 Southeast Fourth Street, is located approximately 0.35 mile to the south-southwest of the subject property. There were four discharges on August 21, 1990. Cleanup was required. On February 26, 1996, the discharge cleanup status is NFA-complete. The facility has been assigned a site priority score of 96. The status of the site is facility closed.

Shannon's Auto Service, at 1005 Southeast Fourth Street, is located approximately 0.39 mile to the south-southwest of the subject property. There were three discharges on March 29, 1991. Cleanup was not required. On May 29, 2001, the discharge cleanup status is NREQ-complete. The status of the site is facility closed.

Viper Boats, at 1106 Southeast Fourth Avenue, is located approximately 0.43 mile to the east-northeast of the subject property. There were four discharges on December 20, 1988. Cleanup was required. On October 9, 2000, the discharge cleanup status is ENTD-inactive. The facility has been assigned a site priority score of 10. The status of the site is facility closed.

Gas Depot, at 801 South Main Street, is located approximately 0.44 mile to the west-southwest of the subject property. There were six discharges on December 27, 1988. RA-ongoing cleanup was required. The cleanup work status is active. The facility has been assigned a site priority score of 10. The status of the site is facility closed.

Gainesville City Regional Transit System, at 100 Southeast Tenth Avenue, is located approximately 0.4 mile to the south-southwest of the subject property. There were four discharges on January 29, 1987. Cleanup was required. On October 9, 2000, the discharge cleanup status is ENTD-inactive. The facility has been assigned a site priority score of 9. The status of the site is facility open.

Florida Rock Industries Inc./Denny Division, at 924 South Main Street, is located approximately 0.50 mile to the west-southwest of the subject property. There were four discharges on September, 1988. Cleanup was required. On October 9, 2000, the discharge cleanup status is ENTD inactive. The facility has been assigned a site priority score of 5. The status of the site is facility open.

Alachua County School Board Jay Williams Elementary, at 1245 Southeast Seventh Avenue, is located approximately 0.50 mile to the east of the subject property. There were four discharges on December 1, 1988. Cleanup was required. On October 9, 2000, the discharge cleanup status is ENTD inactive. The facility has been assigned a site priority score of 9. The status of the site is facility closed.

Coleman Oil Company, at 907 Southwest Third Street, is located approximately 0.50 mile to the west-southwest of the subject property. There were six discharges on December 30, 1988. RA-ongoing cleanup was required. The cleanup work status is active. The facility has been assigned a site priority score of 46. The status of the site is facility closed.

Cemex, Inc.-Gainesville Readymix PLT, at 305 Southwest Depot Avenue, is located approximately 0.50 mile to the west-southwest of the subject property. There were five discharges on November 7, 1989. Cleanup was required. On October 9, 2000, the discharge cleanup status is ENTD inactive. The facility has been assigned a site priority score of 6. The status of the site is facility open.

5.1.2.4 <u>State/Tribal Registered Underground Storage Tank (UST; Site and Adjoining Properties)</u>

The Underground Storage Tank database contains registered USTs. Shortly after the September 11 event, FDEP was instructed to remove the detail about some of the storage tank facilities in the state from their reports. Federal-owned facilities and bulk storage facilities are included in that set.

There are 11 properties listed within 0.25-mile of the subject site.

Gainesville City Fleet Maintenance Facility is located at 400 Southeast Fifth Avenue adjacent to the subject site. Currently, there are three listed USTs onsite. There is one 20,000-gallon vehicular diesel UST, one 15,000-gallon unleaded gas UST, and one 6,000-gallon unleaded gas UST. Nine USTs have been removed. The status of the site is open.

Jimmy's Auto Mart, at 944 Southeast Fourth Street, is located approximately 0.35 mile to the south-southwest of the subject property. There are currently no USTs onsite. One 1,000-gallon unleaded gas UST was removed on August 31, 1990. The status of the site is closed.

Moody and Salzman, at 506 East University Avenue, is located approximately 0.37 mile to the north-northwest of the subject property. No information was reported on this site. The status of the site is facility closed.

Harvey's Market, at 802 Southeast Seventh Avenue, is located approximately 0.17 mile to the east-southeast of the subject property. There are currently no USTs onsite. Two 550-gallon unleaded gas USTs and one 287-gallon kerosene UST were removed on August 31, 1990. The status of the site is closed.

Alachua County Sheriff's Office, at 913 Southeast Fifth Street, is located approximately 0.25 mile to the south-southwest of the subject property. There are currently no USTs on

site. One 2,000-gallon and two 1,000-gallon unleaded gas USTs were removed on August 31, 1988. The status of the site is closed.

Rinker Materials Gainesville PLT, at 900 Southeast Fourth Street, is located approximately 0.29 mile to the south-southwest of the subject property. There are currently no USTs onsite. One 2,000-gallon and one 1,000-gallon vehicular diesel USTs were removed on November 1, 2003. The status of the site is closed.

Continental Imports, at 604 Southeast Second Street, is located approximately 0.28 mile to the south-southwest of the subject property. There are currently no USTs onsite. Four 3,000-gallon waste oil USTs were removed on October 31, 1989. The facility has been assigned a site priority score of 56. The status of the site is facility closed.

Poole Roofing and Sheet Metal, at 710 Southeast Second Street, is located approximately 0.29 mile to the west-southwest of the subject property. There are currently no USTs on site. One 1,000-gallon unleaded gas UST was removed on August 31, 1991. One 550-gallon leaded gas UST was removed on June 30, 1990. The status of the site is facility closed.

Ferber and Osteen Roofing and Sheet Metal, at 710 Southeast Ninth Place, is located approximately 0.29 mile to the south of the subject property. There are currently no USTs onsite. One 4,000-gallon and one 888-gallon leaded gas USTs have been removed. The status of the site is facility closed.

Gainesville Food Store, at 1030 Southeast Fourth Avenue, is located approximately 0.33 mile to the east-northeast of the subject property. There are currently no USTs onsite. Two 3,000-gallon unleaded gas, one 4,000-gallon unleaded gas, one 888-gallon kerosene, and one 888-gallon waste oil USTs were removed by September 1995. The status of the site is facility closed.

Jimmy's Auto Mart, at 944 Southeast Fourth Street, is located approximately 0.35 mile to the south-southwest of the subject property. There are currently no USTs onsite. One 1,000-gallon unleaded gas UST was removed August 31, 1990. The status of the site is facility closed.

5.1.2.5 <u>State/Tribal Institutional Control/Engineering Control Registries (Site Only)</u>

This database contains registry entries for institutional and engineering controls.

There are no properties listed within 0.5-mile radius of the subject property.

5.1.2.6 <u>State/Tribal Voluntary Cleanup Sites (0.5-mile)</u>

This database contains listings for current voluntary cleanup sites.

There is one property listed within 0.5-mile of the subject site.

Poole Roofing and Sheet Metal, at 710 Southeast 2nd Street, is located approximately 0.29 mile to the west-southwest of the subject property. A voluntary cleanup agreement has been executed for this site. The facility status is open.

5.1.2.7 <u>State and Tribal Brownfield Sites (0.5-mile)</u>

This database contains listings for current Brownfield sites.

There is one property listed within 0.5-mile radius of the subject site.

Gainesville Area, in Gainesville, Florida, is located approximately 0.23 mile to the west of the subject property. The Brownfield site contains three areas of acreage. The first area contains 26 acres, and is in the water management district of St. Johns River Water Management District (SJRWMD). The second area was a former CSX property, and is awaiting cleanup for a 25-acre area. The third area contains GRU/Pool Roofing site and contains 2 acres undergoing active site remediation.

5.1.2.8 Florida Priority Cleaners (FPC; 0.5 mile)

The Florida Priority Cleaners list comes from the FDEP.

There is one property listed within 0.5-mile radius of the subject site.

S&S Cleaners, Inc., at 503 Southwest Third Street, is located approximately 0.5 mile to the west of the subject property. The facility is an open drycleaners. The score of the facility is a 30.

5.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

No other additional database records were provided in the database search report.

5.3 PHYSICAL SETTING SOURCE(S)

The U.S. Geological Survey (USGS) 7.5-minute quadrangle map of Gainesville East, Florida was reviewed. The subject property is at an elevation about 145 feet above mean sea level (ft-msl). The surrounding area has a slope predominantly towards the southeast.

5.4 HISTORICAL USE INFORMATION ON THE PROPERTY

To evaluate historical use of the property, ECT reviewed readily available topographic maps, aerial photographs, street directories, and fire insurance maps.

5.4.1 TOPOGRAPHIC MAPS

ECT reviewed the USGS 7.5-minute series quadrangle map of Gainesville East, Florida. This map was retrieved from www.topozone.com and is dated 1966. No structures are depicted on the subject property. The roads in the vicinity of the site are depicted. A road is shown running north to south through east portion of the subject property. A copy of the map is provided as Figure 1.

5.4.2 **AERIAL PHOTOGRAPHS**

Historical aerial photographs were obtained from the Florida Department of Transportation Department Surveying and Mapping Office for the years 1964, 1971, 1982, 1994,

and 2004. The aerial photographs for the years 1937, 1949, 1956, 1961, and 1968 were acquired from the University of Florida Map Library. The photographs were reviewed to identify former land uses onsite and in the vicinity of the subject property. The photographs consisted of low-altitude, black-and-white photographs. Brief descriptions of the subject property and vicinity, as observed in the aerial photographs, are presented below. Figure 2 is a copy of the 1961 aerial photograph which shows the beginning of the construction phase on the property.

In the 1937 aerial photograph, the subject property appears to be mostly cleared land with some residential. The subject property remains mostly residential with some wooded area in the 1949 and 1956 aerial photographs. The 1961 aerial photograph is shown in Figure 2. In the 1961, 1964, 1968, and 1971 aerial photographs, the west portion of the subject property has been completely cleared with some residential to the east. It appears that some of the residential buildings have been removed or converted to commercial along the east portion of the property in the 1982 aerial photograph. A long building on the west-northwest side and a building on the west-southwest side of the property are shown in the 1982 aerial photograph. No changes were apparent in the 1994 aerial photograph. Three commercial buildings, no residential buildings, and a parking area are shown in the 2004 aerial photograph.

No evidence of environmental impairment to the subject site was observed from the aerial photography review.

5.4.3 STREET DIRECTORIES

ECT reviewed historical city directories at the Alachua County Public Library. Historical suburban directories as published by R. J. Polk & Company were reviewed at generally 1-to 2-year intervals from 1948 to 2006. The subject property address is first listed in the 1974 directory as City Sanitary Sewer Collection Division until 1977. From 1977 to 1997 the subject property was listed as City Regional Utility Water Distribution Department. From 1999 to 2004 there was no current listing in the city directories. In the 2005 and

2006 city directory, the subject property address was listed as Gainesville Water Construction.

5.4.4 FIRE INSURANCE MAPS

Sanborn fire insurance maps were not researched for the subject property.

5.5 HISTORICAL USE INFORMATION ON ADJOINING PROPERTIES

To evaluate the historical use of the adjacent properties, ECT reviewed readily available topographic maps, aerial photographs, street directories, and fire insurance maps.

5.5.1 TOPOGRAPHIC MAPS

A review of the available topographic map indicates that the adjacent roadway network is depicted. The power plant is shown to the southwest of the subject property. This map was retrieved from www.topozone.com and is dated 1966. A copy of this map is provided as Figure 1.

5.5.2 AERIAL PHOTOGRAPHS

In the 1937 and 1949 aerial photographs, the majority of the adjoining properties are residential. A large warehouse is located south of the property. In the 1956 and 1961 aerial photograph, some commercial buildings are shown to the west. In the 1964 and 1968 aerial photographs, more commercial development is shown south and southwest. In the 1971 aerial photograph, there is a parking lot area located west of the subject property. In the 1982, 1994, and 2004 aerial photographs, there are no apparent changes around the subject property.

5.5.3 STREET DIRECTORIES

ECT reviewed historical city directories at the Alachua County Public Library. Historical suburban directories as published by R. J. Polk & Company were reviewed at generally 1-to 2-year intervals from 1948 to 2006. The property located west of the subject site at 400 Southeast Fifth Avenue was the City Garage from 1951 to 1997. In 1999, the property was listed as Gainesville Fleet Management. The property located south of the sub-

ject site at 555 Southeast Fifth Avenue was listed as Thomas J Davis General Contractor from 1955 to 1959. From 1961 to 1976, the property was listed as City Utility Operations Center. From 1977 to 1997, the property was listed as City Regional Utility System. In 1999, the property was listed as Gainesville Regional Utility. North and east of the subject property have been residential since 1948.

5.5.4 FIRE INSURANCE MAPS

Sanborn fire insurance maps were not researched for the adjoining properties.

5.6 <u>WETLANDS</u>

The National Wetlands Inventory (NWI) Web site was researched to determine if any wetland areas are shown on or abutting the subject property. No wetlands are shown in the immediate area. The quadrangle map did not indicate any wetland features onsite. No obvious wetland areas were observed onsite.

6.0 SITE RECONNAISSANCE

On July 20, 2007, Ms. Kacie Blue, an associate engineer at ECT, performed an assessment of the subject property to observe general site conditions and indications of the possible release(s) of chemicals to the subsurface. A walkover site inspection was conducted to identify visible evidence of RECs. Ms. Donna Honsberger of the GRU Field Services Department was available to accompany ECT during the site inspection of the field services building. The site property and its three building were open, so ECT personnel had access to the entire building. Photographs taken during ECT's site inspection are included in Appendix B. Ms. Blue's qualifications are provided in Appendix C.

6.1 METHODOLOGY AND LIMITING CONDITIONS

ECT was provided full access to the property. The methodology for the site visit included observing the interior and exteriors of the subject property.

6.2 GENERAL SITE SETTING

6.2.1 CURRENT USE(S) OF THE PROPERTY

The subject property is developed with three one-story buildings. The three buildings include two main office spaces and one support building for technicians.

6.2.2 PAST USE(S) OF THE PROPERTY

The property was previously residential. The current buildings have had no other uses.

6.2.3 CURRENT USES OF ADJOINING PROPERTIES

The adjoining properties are located within an area predominantly developed with residential and commercial uses such as utilities services and power plant.

6.2.4 PAST USES OF ADJOINING PROPERTIES

Based on a review of aerial photographs, the areas surrounding the subject property to the north and east were mainly residential. The areas west and south of the subject property developed commercially in the late 1940s.

6.2.5 CURRENT OR PAST USES IN THE SURROUNDING AREA

Based on a review of aerial photographs, the areas surrounding the subject property to the north and east were mainly residential. The areas west and south of the subject property developed commercially in the in the late 1940s.

6.2.6 GEOLOGIC, HYDROGEOLOGIC, HYDROLOGIC, AND TOPOG-RAPHIC CONDITIONS

Alachua County is part of the Central Florida Ridge within the Central Highlands of the Atlantic Coastal Plain. It has four major geological formations which have influence soil development. They are the Ocala Group, the Hawthorn Formation, the Alachua Formation, and the Plio-Pleistiocene Terrace Deposits.

The regional aquifer system consists of three major geohydrologic units: the surficial aquifer, intermediate, and Floridan aquifer systems; in this area; however, the Plio-Pleistocene Terrace Deposits, which comprise the surficial aquifer, are not present. Recharge to this aquifer is by infiltration of rainwater. The intermediate aquifer is from infiltration from overlying aquifers and point source recharge. The Hawthorn Formation acts as the upper confining unit for the Floridan aquifer. Recharge to the Floridan aquifer is from rainwater infiltration in unconfined areas and point source recharge through solution features. Virtually all of Alachua County's water supply for potable consumption, industry, and irrigation is withdrawn from wells in the Floridan aquifer. The ground water flow in the area of the site is to the south.

6.3 EXTERIOR OBSERVATIONS

The following items were looked for, or identification was attempted, as indicated in the ASTM standard.

6.3.1 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS IN CONNECTION WITH IDENTIFIED USES

The presence of hazardous substances or petroleum products in connection with the subject property was investigated. No hazardous substances or petroleum products beyond what would be considered *de minimis* volumes were observed onsite.

6.3.2 STORAGE TANKS

ASTs; USTs; or vent pipes, fill pipes, or access ways indicating USTs were looked for during the site visit. No evidence of an AST, UST, vent pipe, fill pipes, or access ways was observed onsite.

6.3.3 ODORS

The subject site was checked for strong, pungent, or noxious odors and their sources during the site visit. No readily noticeable strong, pungent, or noxious odors were encountered.

6.3.4 POOLS OF LIQUID

Standing surface water and pools or sumps containing liquids likely to contain hazardous substances or petroleum products were looked for during the site visit. No standing surface water, pools, or sumps were observed onsite.

6.3.5 DRUMS

Storage drums were looked for during the site visit. No drums were observed on the exterior of the buildings.

6.3.6 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS CONTAINERS (NOT NECESSARILY IN CONNECTION WITH IDENTIFIED USES)

Hazardous substances and petroleum products containers were looked for during the site visit. No hazardous substances or petroleum products containers were noted.

6.3.7 UNIDENTIFIED SUBSTANCE CONTAINERS

Open or damaged containers containing unidentified substances suspected of being hazardous substances or petroleum products were looked for during the site visit. No such containers were observed.

6.3.8 PCBS

Electrical or hydraulic equipment known to contain PCBs or likely to contain PCBs were looked for during the site visit. As indicated in the ASTM standard, fluorescent light ballasts (which may or may not be present onsite) were not evaluated. Four pole-mounted transformers were observed on the subject property. The transformers are owned by the City of Gainesville and appeared to be in good condition.

6.3.9 PITS, PONDS, OR LAGOONS

Pits, ponds, or lagoons on the property were looked for during the site visit. Pits, ponds, or lagoons on properties adjoining the property were looked for to the extent they were visually and/or physically observable from the subject site. No pits, ponds, or lagoons were observed onsite.

6.3.10 STAINED SOIL OR PAVEMENT

Areas of stained soil or pavement were looked for during the site visit. There were stained areas of the parking lot from vehicles being parked there over time. No areas of stained soil were observed during the site visit.

6.3.11 STRESSED VEGETATION

Areas of stressed vegetation (from other than insufficient watering) were looked for during the site visit. No areas of stressed vegetation were observed during the investigation.

6.3.12 SOLID WASTE

Areas that are apparently filled or graded by non-natural causes (or filled by fill of unknown origin) suggesting trash construction debris, demolition debris, or other solid waste disposal, or mounds or depressions suggesting trash or other solid waste disposal were looked for during the site visit. No such areas were observed during this investigation. No hazardous materials were observed in the area of the former dumpsters (east side of the building).

6.3.13 WASTEWATER

Wastewater or other liquids (including stormwater) or any discharge into a drain, ditch, underground injection system, or stream on or adjacent to the subject site were looked for during the site visit. No wastewater discharge was observed.

6.3.14 WELLS

Wells, including dry wells, irrigation wells, injection wells, monitoring wells, abandoned wells, or other wells, were looked for during the site visit. No wells were observed on the property.

6.3.15 SEPTIC SYSTEMS

Indications of onsite septic systems or cesspools were looked for during the site visit. No evidence of onsite septic systems or cesspools was observed.

6.4 INTERIOR OBSERVATIONS

The following items were looked for, or identification was attempted, as indicated in the ASTM standard.

6.4.1 HEATING/COOLING

The means of heating and cooling the buildings on the property, including the fuel source for heating and cooling, was attempted to be identified during the site visit. Based on visual observations, the buildings are heated and cooled by electrical heating, ventilating, and air conditioning units.

6.4.2 STAINS OR CORROSION

Areas of stains or corrosion of floors, walls, or ceilings in both buildings were looked for during the site visit. No areas of significant staining or corrosion were observed in the support building or wastewater office during this investigation. However, there was significant staining on the walls in the field services office due to possible mold.

6.4.3 DRAINS AND SUMPS

Floor drains and sumps were looked for during the site visit. No floor drains or sumps were observed on the interior of the buildings during the site visit. However, a drain was noted north of the field services technician facility.

6.4.4 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS IN CONNECTION WITH IDENTIFIED USES

The presence of hazardous substances or petroleum products was investigated. Hazardous substance of Jetfoam, which is an emulsifier additive for high-power sewer cleaner, was stacked in the storage area of the support building. There were also several 5-gallon plastic gasoline cans observed in the field services technician storage garage area.

6.4.5 STORAGE TANKS

ASTs, USTs, vent pipes, fill pipes, or access ways indicating USTs were looked for during the site visit. No ASTs, evidence of USTs, vent pipes, fill pipes, or access ways were observed onsite.

6.4.6 ODORS

ECT representatives checked for strong, pungent, or noxious odors and their sources during the site visit. No noticeable strong, pungent, or noxious odors were encountered inside the structure.

6.4.7 POOLS OF LIQUID

Standing surface water and pools or sumps containing liquids likely to contain hazardous substances or petroleum products were looked for during the site visit. No standing surface water, pools, or sumps were observed.

6.4.8 DRUMS

One 55-gallon storage drum was observed onsite in the field services technician storage garage area.

6.4.9 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS CONTAINERS (NOT NECESSARILY IN CONNECTION WITH IDENTIFIED USES)

Hazardous substances and petroleum products containers were looked for during the site visit. No hazardous substances containers were observed besides the Jetfoam noted earlier.

6.4.10 UNIDENTIFIED SUBSTANCE CONTAINERS

Open or damaged containers containing unidentified substances suspected of being hazardous substances or petroleum products were looked for during the site visit. No open or damaged containers containing unidentified substances suspected of being hazardous substances or petroleum products were observed during the investigation.

6.4.11 PCBS

Electrical or hydraulic equipment known to contain PCBs or likely to contain PCBs was looked for during the site visit. As indicated in the ASTM standard, fluorescent light ballasts (which may or may not be present onsite) were not evaluated. No electrical or hydraulic equipment known to contain PCBs or likely to contain PCBs were identified inside the structures during this investigation.

7.0 INTERVIEWS

7.1 <u>INTERVIEWS WITH SITE CONTACTS</u>

Prior to completion of the Phase I ESA, ECT corresponded with Ms. Embry from GRU. Ms. Embry was asked if she knew whether any of the documents below exist and, if so, whether copies would be provided:

- ESA reports.
- Environmental audit reports.
- Environmental permits (for example, solid waste disposal permits, hazardous waste disposal permits, wastewater permits, National Pollutant Discharge Elimination System permits, underground injection permits).
- Registrations for USTs and ASTs.
- Registrations for underground injection systems.
- Material safety data sheets.
- Community right-to-know plan.
- Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc.
- Reports regarding hydrogeologic conditions on the property or surrounding area.
- Notices or other correspondence from any government agency relating to
 past or current violations of environmental laws with respect to the property
 or relating to environmental liens encumbering the property.
- Hazardous waste generator notices or reports.
- Risk assessments.
- Recorded activity use limitations.
- Do you know of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?
- Do you know of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?

• Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?

Ms. Embry responded that she did not know if there were any previous ESA reports, environmental audit reports, reports regarding hydrogeologic conditions on the property or surround area, and risk assessments. Ms. Embry stated that there were registrations for USTs and ASTs, material safety data sheets, safety plans, hazardous waste generator notices or reports, and one notice or other correspondence from any government agency relating to past or current violation of environmental laws with respect to the property or relating to environmental liens encumbering the property. Ms. Embry stated that Tommy Cook would further explain this matter. Mr. Tommy Cook stated that years ago EPA did an inspection and there was a documented noncompliance which was immediately resolved. It was a labeling issue that was corrected by putting a tag on the item which was already stored in the properly designated storage area. Ms. Embry stated that there was no community right-to-know plan; however, there was an emergency response plan. Ms. Embry responded no to the remainder of the questions.

7.2 INTERVIEWS WITH LOCAL GOVERNMENT OFFICIALS

No local or state government officials were contacted during this investigation. Information obtained through the interviews, historical review, and review of the regulatory agency files provided sufficient information for the investigations. ECT personnel did interview the local fire department personnel and was informed that they have not responded to a call at the subject property.

8.0 FINDINGS

This section identifies known or suspect RECs, historical RECs, and *de minimis* conditions discovered during the Phase I ESA investigations.

8.1 KNOWN OR SUSPECT RECS

Possible mold on the walls of the field services building was observed. Ceiling tiles and vinyl floors were observed throughout the field services building, which could have possible traces of asbestos.

8.2 HISTORICAL RECS

Ms. Donna Honsberger stated that there had been a wall replaced in the field services building and mold was discovered behind the wall. She also stated that during heavy rains there had been issues with flooding from the parking lot into the rear entrance of the field services building.

8.3 DE MINIMIS CONDITIONS

No *de minimis* conditions were identified during this Phase I ESA.

9.0 OPINION

This section presents the environmental professional's opinion(s) of the impact on the property of conditions identified in the findings section.

There was no evidence observed to indicate a release of any hazardous materials or petroleum products has occurred onsite based on historical documentation. There is no evidence that there has been significant use or storage of hazardous materials or petroleum products throughout the historic use of the subject property.

The land use history of the subject property did not indicate the likelihood of the use and/or storage of significant quantities of petroleum or solvent products.

During the site reconnaissance, Ms. Donna Honsberger stated that there had been a wall replaced in the field services building and mold was discovered behind the wall. She also stated that during heavy rains there had been issues with flooding from the parking lot into the rear entrance of the field services building. In addition, possible asbestoscontaining ceiling tiles and vinyl flooring was noted throughout the field services office space. Due to the historical information provided, the current staining issues, and possible asbestos-containing materials throughout the interior of the building; ECT recommends the field services office space building have a mold inspection performed as well as an asbestos inspection.

10.0 CONCLUSIONS

ECT has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-05 of the GRU Parcel 1 property located at 528 Southeast Fifth Avenue in Gainesville, Florida. Any exceptions to, or deletions from, this practice are described in Section 11.0 of this report. This assessment has revealed possible evidence of RECs in connection with the property. ECT recommends a Phase II ESA investigation for mold and asbestos at this time. A copy of the Three City Parcels-GRU environmental services agreement/scope of work is provided in Appendix D.

11.0 DEVIATIONS/DATA GAPS

The following deviations from the ASTM practice were identified:

The recently-enacted All Appropriate Inquiry standard and ASTM practice indicates that interviews with past and present owners, operators, and occupants of the subject property must be conducted. No past owners were interviewed during this assessment. Based on the historical information reviewed for this assessment, the impact of this deviation is considered negligible with regard to identifying RECs.

12.0 ADDITIONAL SERVICES

The Federal Emergency Management Agency online database was researched to determine the applicable flood zone of the subject property.

The following additional services were not provided as part of the scope for conducting this Phase I ESA:

- Radon assessment.
- Lead-based paint.
- Lead in drinking water.
- Wetlands.
- Regulated compliance.
- Cultural and historic resources.
- Industrial hygiene.

- Health and safety.
- Ecological resources.
- Endangered species.
- Indoor air quality.
- Biological agents.
- Asbestos survey.
- Mold.

14.0 SIGNATURE(S) OF ENVIRONMENTAL PROFESSIONAL(S)

The environmental assessment described herein was conducted by the undersigned em-

ployees of ECT. ECT's investigation consisted solely of the activities described in the

Introduction of this report and in accordance with the Terms and Conditions of the Stan-

dard Consulting Services Agreement signed prior to initiation of the assessment, as ap-

plicable.

I declare that, to the best of my professional knowledge and belief, I meet the definition

of environmental professional as defined in 40 Code of Federal Regulations (CFR) Sec-

tion 312.10. I have the specific qualifications based on education, training, and experi-

ence to assess a property of the nature, history, and setting of the subject property. I have

developed and performed the all appropriate inquiries in conformance with the standards

and practices set forth in 40 CFR 312.

Report prepared by:

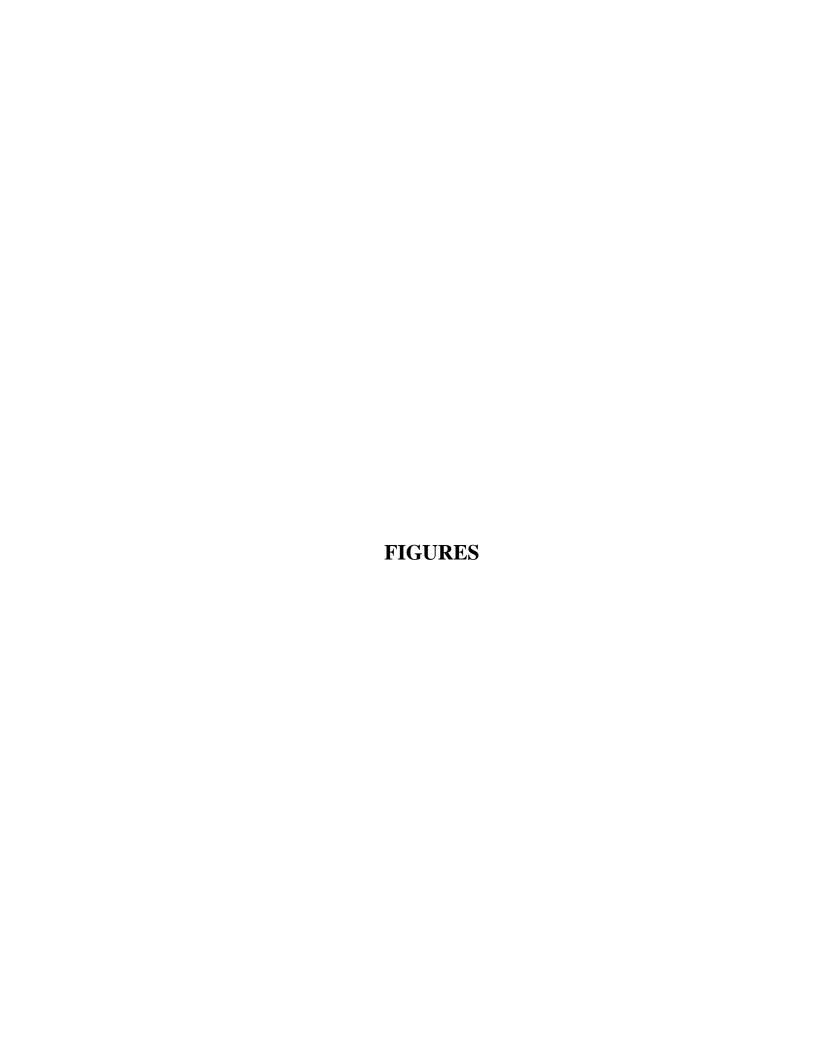

Kacie Blue

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 02/27/2007 has revealed that there is 1 CERCLIS site within approximately 0.625 miles of the target property.

Lower Elevation	Address	Dist / Dir	Map ID	Page
GAINESVILLE GASIFICATION PLANT	710 SE. 2ND STREET	1/4 - 1/2 WSV	N 131	58

RCRAInfo: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/13/2006 has revealed that there are 8 RCRA-SQG sites within approximately 0.375 miles of the target property.

STATE AND LOCAL RECORDS

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection's Facility Directory (Solid Waste Facilities).

A review of the SWF/LF list, as provided by EDR, and dated 05/15/2007 has revealed that there is 1 SWF/LF site within approximately 0.625 miles of the target property.

UST: The Underground Storage Tank database contains registered USTs. Shortly after the September 11 event, the DEP was instructed to remove the detail about some of the storage tank facilities in the state from their reports. Federal-owned facilities and bulk storage facilities are included in that set.

A review of the UST list, as provided by EDR, and dated 05/01/2007 has revealed that there are 11 UST sites within approximately 0.375 miles of the target property.

EDR PROPRIETARY RECORDS

EDR Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there is 1 Manufactured Gas Plants site within approximately 1.125 miles of the target property.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

EGRID

FRP

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RACT/BACT/LAER Clearinghouse (RBLC) data base contains case-specific information on the 'Best Available' air pollution technologies that have been required to reduce the emission of air pollutants from stationary sources (e.g., power plants, steel mills, chemical plants, etc.). This information has been provided by State and local permitting agencies. The Clearinghouse also contains a regulation data base that summarizes EPA emission limits required in New Source Performance Standards (NSPS), National Emission Standards for Hazardous Air Pollutants (NESHAP), and Maximum Achievable Control Technology (MACT) standards.

CAMDBS (Clean Air Markets Division Business System) is a national information system that supports the implementation of market-based air pollution control programs administered by the Clean Air Markets Division, within the Office of Air and Radiation. These programs include the Acid Rain Program, established by Title IV of the Clean Air Act Amendments of 1990, and regional programs designed reduce the

1000698407

transport of ozone. These emissions trading programs allows regulated facilities (primarily electric utilities) to adopt the most cost-effective strategies to reduce emissions at their units. Units that reduce their emissions below the number of allowances they hold -- each allowance is equivalent to one ton of sulfur dioxide or nitrogen oxides -- may trade allowances with other units in their system, sell them to other utilities on the open market or through EPA auctions, or bank them to cover emissions in future years. CAMDBS functions include registering responsible officials, establishing allowance accounts, reporting hourly emissions data, and transferring allowances between accounts.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be a potential NPL site.

RCRA: Resource Conservation and Recovery Act Information

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

ENG CONTROLS: Institutional Controls Registry

The registry is a database of all contaminated sites in the state of Florida which are subject to engineering controls. Engineering Controls encompass a variety of engineered remedies to contain and/or reduce contamination, and/or physical barriers intended to limit access to property. ECs include fences, signs, guards, landfill caps, provision of potable water, slurry walls, sheet pile (vertical caps), pumping and treatment of groundwater, monitoring wells, and vapor extraction systems.

FL Cattle Dip. Vats: Cattle Dipping Vats

From the 1910 s through the 1950 s, these vats were filled with an arsenic solution for the control and eradication of the cattle fever tick. Other pesticides, such as DDT, were also widely used. By State law, all cattle, horses, mules, goats, and other susceptible animals were required to be dipped every 14 days. Under certain circumstances, the arsenic and other pesticides remaining at the site may present an environmental or public health hazard.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its

fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Universal Tranverse Mercator: Zone 17 UTM X (Meters): 372387.3 UTM Y (Meters): 3280207.8

Elevation: 149 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 29082-F3 GAINESVILLE EAST, FL

Most Recent Revision: 1994

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

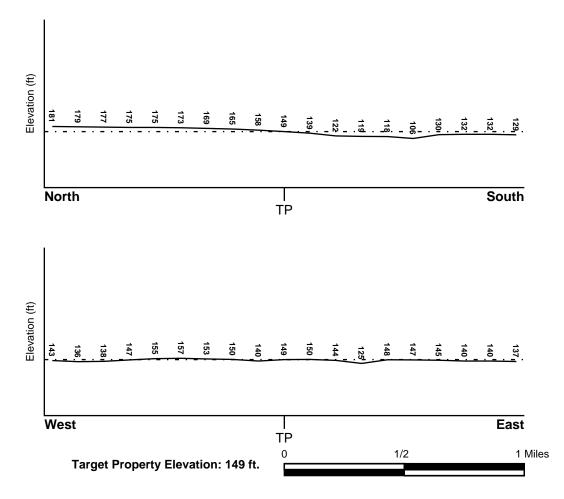

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

	Soil Layer Information							
	Boundary Classification							
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)	
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00	

Soil Map ID: 2

Soil Component Name: MILLHOPPER

Soil Surface Texture: sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to

excessively drained sands and gravels.

Soil Drainage Class: Moderately well drained. Soils have a layer of low hydraulic

conductivity, wet state high in the profile. Depth to water table is 3

to 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: LOW

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

	Soil Layer Information							
Boundary				Classification				
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)	
1	0 inches	58 inches	sand	Granular materials (35 pct. or less passing No. 200), Fine Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 6.50 Min: 4.50	

Soil Map ID: 3

Soil Component Name: BLICHTON

Soil Surface Texture: sand

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly. Soils may have a saturated zone, a layer of low hydraulic

conductivity, or seepage. Depth to water table is less than 1 foot.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

Soil Layer Information								
	Воц	ındary		Classification				
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)	
1	0 inches	26 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 6.00 Min: 4.50	

Soil Map ID: 4

Soil Component Name: KANAPAHA

Soil Surface Texture: sand

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be

drained and are classified.

Soil Drainage Class: Poorly. Soils may have a saturated zone, a layer of low hydraulic

conductivity, or seepage. Depth to water table is less than 1 foot.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

	Soil Layer Information								
	Вои	ındary		Classi	fication				
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)		
1	0 inches	7 inches	sand	Granular materials (35 pct. or less passing No. 200), Fine Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 6.00 Min: 4.50		

Soil Map ID: 5

Soil Component Name: TAVARES

Soil Surface Texture: sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to

excessively drained sands and gravels.

Soil Drainage Class: Moderately well drained. Soils have a layer of low hydraulic

conductivity, wet state high in the profile. Depth to water table is 3

to 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: LOW

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

	Soil Layer Information							
	Воц	ındary		Classi	fication			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)	
1	0 inches	7 inches	sand	Granular materials (35 pct. or less passing No. 200), Fine Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 20.00 Min: 6.00	Max: 6.00 Min: 3.60	

Soil Map ID: 6

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to

excessively drained sands and gravels.

Soil Drainage Class: Moderately well drained. Soils have a layer of low hydraulic

conductivity, wet state high in the profile. Depth to water table is 3

to 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

Soil Layer Information							
	Boundary Classification						
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX C QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Senior Technician; Food Store No. 1015, The Pantry—Provided technical assistance for the collection of ground water samples at an inactive petroleum facility in Jacksonville, Florida.

Senior Technician; Food Store No. 6042, The Pantry—Surveyed well elevations and collected ground water samples at an active petroleum facility in Jacksonville, Florida.

Senior Technician; Food Store No. 6101, The Pantry—Assisted in the adjustments of a remedial system at a petroleum site in Jacksonville, Florida.

Associate Engineer; Florida Department of Environmental Protection (FDEP) Florida Cleanup Program—Assisted with the installation of monitoring wells at a Circle K site in Seffner, Florida, to aid in contaminant plume delineation. Collected ground water samples from select monitoring wells for laboratory analyses.

Associate Engineer; Coca-Cola—Assisted with remedial system installation tasks that included oversight of air sparge/soil vapor extraction well and piping installation, remedial trailer setup, and associated electrical connections at a site in Okaloosa County, Florida.

Associate Engineer; FDEP Florida Cleanup Program—Assisted with the oversight of a large soil excavation project at Foshalee Farms in Leon County, Florida, using large-diameter augers. Tasks included field screening, locating boreholes, and providing lithologic descriptions. Leon County

Task Manager/Project Assistant; ASTM Phase I Environmental Site Assessments (ESAs), Numerous Clients—Conducted Phase I ESAs in accordance with ASTM-E1527 on numerous small- and large-acreage parcels located primarily in the panhandle and Tallahassee areas of Florida. Tasks included interviewing site personnel and local municipal agencies, and photodocumenting sites and structures. Assisted in the preparation of Phase I ESA reports.

Areas of Specialization

Project Management, Contamination Assessment, Remediation, Geology, Hydrogeology, Economic Geology, Environmental Site Assessments, Environmental Permitting Program Director; Multiple Petroleum Remediation Sites, The Pantry, Inc.—Responsible for coordination, contract, and program management of over 150 petroleum assessment and remediation projects throughout Florida for a large regional petroleum marketing chain. Duties consisted of quality control of deliverables, scheduling, client interface, regulatory agency interface, technical review and project management. Also coordinated environmental NPDES permitting for dewatering operations, tank removals, and closure assessments related to storage tank facility upgrades for Pantry's tank system upgrade program 2009 to comply with EPA's 2009 upgrade deadline.

Project Manager; Multiple Petroleum Assessment and Remediation Sites, Murphy Oil USA, Inc.—Responsible for management and administration of contamination assessment, risk assessment, and remediation sites in Florida, South Carolina, and Alabama, pertaining to discharges from aboveground and underground petroleum storage tanks.

Project Manager; Multiple Petroleum Assessment and Remediation Sites, Amerada Hess Corporation—Responsible for contract and project management and administration of multiple contamination assessment and remediation sites in Florida and Georgia pertaining to discharges from aboveground and underground petroleum storage tanks.

Principal Geologist; Assessment/Remediation, Commodore's Point Terminal Corporation—Projects included contamination assessment, remedial system design, initial remedial actions and source removal, remediation system operation and maintenance, National Pollution Discharge and Elimination System (NPDES) discharge permitting, and ground water monitoring at a multi-parcel former petroleum bulk fuel storage facility in Jacksonville, Florida

Project Manager; Former Bulk LNAPL Storage Site, Commodore's Point Terminal Corporation—Responsible for assessment, waste characterization, regulatory agency mediation, and feasibility analysis for properties in Jacksonville impacted by discharges of LNAPL/terpene products.

Project Manager; Contamination Assessment, Conrail—Conducted hydrogeological and contamination assessment for surficial discharge of chlorinated pesticides at a former pesticide storage and discharge site in Live Oak, Florida. Project consisted of analysis of impacts to both surficial and secondary aquifers.

Project Manager; Delineation Assessment, Container Corporation—Conducted waste characterization and delineation of soil contamination resulting from surficial discharge of heavy metal-laden printing inks at a facility in Fernandina Beach, Florida. Impacted media exceeded leachability standards for hazardous waste for lead and chromium.

Project Manager; Assessment and Interim Remediation, St. Johns County—Conducted Phase II investigation, site assessment and delineation, initial remedial action (source removal), and supplemental site assessment pertaining to the removal of petroleum-impacted soils and petroleum underground storage tanks prior to the construction of the St. Johns County Administrative and Judicial Complex in St. Augustine, Florida. Project consisted of the identification of source areas for existing or potential contamination, verifications and/or delineation of impacted areas, evaluation of onsite and offsite hydrogeological conditions, source removal of petroleum-contaminated media,

JEFFREY L. WAHL, P.G. Page 2

ground water assessment of multiple source areas for various petroleum constituents, technical report preparation, and regulatory mediation.

Project Manager; Peer Review and Evaluation, St. Johns County—Project work performed under a Continuing Services Contract, consisted of site inspection and regulatory file review of the former Wise Foods facility in St. Augustine, Florida. The evaluation was conducted as part of due diligence investigation prior to St. Johns County's acquisition of the property from Borden Foods, Incorporated. The facility had documented release of DNAPL and other solvents, and had undergone various subsurface investigations.

Project Manager; Due Diligence Phase I and Phase II Environmental Site Assessments, Legal Firm Representing Winn-Dixie—Principal evaluator for the acquisition of multiple former Pic-N-Save stores throughout north and central Florida. Projects consisted of conducting Phase I investigations in accordance with American Society for Testing and Materials (ASTM) standards, as well as specialized Phase II investigations to further evaluate recognized environmental conditions.

Project Manager; Supplemental Assessment and Remediation System Construction, Eagle Picher Paint—Project consisted of the management of construction of a soil and ground water remediation system at a former paint solvent discharge site. The design technology consisted of air sparging/soil vapor extraction, in addition to minor source removal.

Project Scientist; Assessment and Waste Characterization, LCP Chemicals—Project consisted of extensive fieldwork under Level B and Level C personal protection, drilling and media sampling of multiple solid waste management units under EPA Superfund direction in Brunswick, Georgia. Contaminants of concerns included free-phase mercury, mercury vapors, sulphur dioxide, hydrogen sulfide, various light and heavy petroleum products, and PCBs.

Project Geologist; Environmental Resource Permitting, EPK Kaolin Mine—Conducted several facets of land use planning and mapping for the continued operation of kaolin mining in Edgar, Florida. Project included wetland mapping, hydrologic evaluation, mitigation planning, resource estimations, and archaeological investigation and delineation, as well as permit application preparation. Permitting was required under Florida Administrative Codes 62-330 and 62-343.

Project Geologist; Evaluation of Potential Aggregate Limestone Deposits—Conducted rock core assessment of several parcels in coastal west-central Florida for the evaluation of potential aggregate deposits for use in concrete manufacturing. The project consisted of core recovery and aggregate processing of samples from several parcels in association with land acquisition due diligence.

Project Geologist; Evaluation of Cemented Coquina Deposits—Project consisted of systematic drilling to determine reserves capacity for coquina deposits for an existing mining operation in Fort Pierce, Florida. Drilling and sampling utilized reverse-air recovery.

Project Geologist; Evaluation of Aggregate Quality and Reserves—Project consisted of systematic drilling, sample recovery, and analysis of limestone aggregate on reserve lands for an operational limestone aggregate processing

JEFFREY L. WAHL, P.G. Page 3

facility in Fort Myers, Florida. Drilling and sample recovery utilized reverseair methodology, evaluation of lithology, and processing of samples to evaluate suitability of aggregate for bulk processing.

Project Geologist; Evaluation of Aggregate Quality and Reserves—Project consisted of systematic drilling, sample recovery, and analysis of limestone aggregate on potential acquisition properties, for expansion of operations of an existing limestone aggregate processing facility in Gulf Hammock, Florida. Drilling and sample recovery utilized conventional PQ and NQ rotary core drilling, evaluation of lithology, and processing of samples to evaluate suitability of aggregate for bulk processing.

Project Geologist; Hydrogeologic Evaluation, AVMED—Project consisted of evaluating surface water, ground water, and geological conditions relative to expansion of a North Central Florida Health Park facility through a significant deviation to the existing development of regional impact document.

Project Manager; Phase II Environmental Site Assessment (ESA), Shands HealthCare—Completed a Phase II ESA on a 20-acre parcel of land proposed for purchase in Alachua County, Florida. Eight soil borings were collected by Geoprobe® to a depth of 20 feet, and evaluated for petroleum contamination. The samples were field screened with a soil vapor analyzer and transported to an environmental laboratory for confirmatory analyses. A Phase II ESA report was prepared.

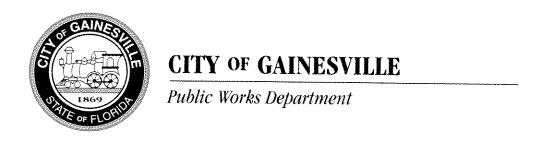

Project Manager; Assessment and Remediation of Petroleum Retail Facilities—Projects consisted of assessment and remediation of multiple retail petroleum facilities for Swifty Serve Corporation throughout Florida. Activities included field sampling and exploration, remediation system design, construction, implementation and operations, and site closure.

Project Manager/Project Director; Storage Tank Facility Construction/Upgrades, Numerous Petroleum Marketers—Projects consisted of coordinating dewatering effluent discharge permitting and compliance sampling through the NPDES General Permit Program, coordinating associated source removal activities where applicable through the State of Florida Petroleum Preapproval Program, and coordinating applicable closure assessments.

Project Manager/Project Director; Bulk Storage Tank Facility Piping Decommissioning, Confidential Client—Project consisted of coordinating degassing and removal of underground petroleum and LNAPL product piping of a former bulk fuel storage facility in conjunction with municipal roadway construction project in northeast Florida.

APPENDIX D

ENVIRONMENTAL SERVICES AGREEMENT/ SCOPE OF WORK

April 6, 2007

Jeffrey L. Wahl, P.G. ECT, Inc. 3701 NW 98 Street Gainesville, Florida 32606

RE: Easterly portions of City owned property, assigned to GRU

Dear Mr. Wahl:

Attached is a boundary survey, prepared by Eng, Denman & Associates, dated June 12, 2004. I have highlighted the eastern portion of three parcels, assigned to Gainesville Regional Utilities and under their control. General Government is considering acquiring these parcels for future development of commercial property.

Please prepare a quote and time frame for the completion of environmental audit, Phase I to establish the potential of contamination of these parcels. The current use for these parcels is industrial storage and it is zoned Public Service and Operations (PS).

Please do not hesitate to contact me at 393-8404, should you have any questions.

Sincerely,

Sam Bridges

Land Rights Coordinator

Environmental Consulting & Technology, Inc.

April 9, 2007 ECT No. P1107-9999

Mr. Samuel H. Bridges Land Rights Coordinator City of Gainesville M.S. 58 Post Office Box 490 Gainesville, Florida 32602

Re:

Proposal for ASTM Phase I Environmental Site Assessments Three Parcels Assigned to GRU, Easterly Portions of City Owned Property Gainesville, Alachua County, Florida

Dear Mr. Bridges:

Environmental Consulting & Technology, Inc. (ECT), is pleased to provide this proposal for providing American Society of Testing and Materials (ASTM) Phase I environmental site assessments (ESAs) (Practice E 1527-05) for the referenced properties. The objectives of ECT's Phase I ESAs are to investigate potential sources of site contamination resulting from current or past site uses involving hazardous materials and to demonstrate due diligence and all appropriate inquiry into potential areas of chemical or other contaminant impact at the site or nearby sites. The Phase I ESA process may lead to a recommendation for further investigation if areas of environmental concern are discovered by ECT's assessor.

The fixed price for conducting a Phase I ESA of the three referenced properties is \$6,800.00. The Phase I ESA reports will be delivered within 4 weeks from the time ECT receives authorization to proceed. This schedule assumes no delays due to problems in obtaining site access, bad weather, or other delays beyond ECT's control.

ECT is looking forward to working with you on this project. If you are in agreement with the proposed scope of work and cost, please sign below and fax to (352) 332-6733 to authorize ECT to proceed. Please contact me at (352) 332-0444, extension 11340, if you have any questions or comments regarding this proposal.

Sincerely,

ENVIRONMENTAL CONSULTING & TECHNOLOGY, INC.

Jeffrey L. Wahl, P.G., Senior Scientist
